

## Point of Entry Light adds Safety, Safety, Safety!

Also called the Articulated Top Safety Light or Entry Point Light, it is an optional accessory available on VENTRY® FAN Models 20GX160 and 24GX160.

The Point of Entry Light is bright, self-contained, and a tremendous safety feature for fire fighters. Available in both halogen and LED, it serves as a point of entry light, lighting the scene before entry, lighting the exit on the way out, and lighting the fan itself during rapid departures.

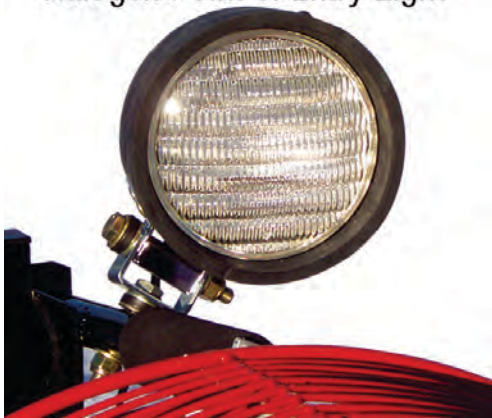

### Entry Point Safety Light Benefits

- ★ Bright, self-contained, and powered by a coil in specially-equipped motors.
- ★ Tips forward and back, and rotates to aim in any direction.
- ★ Folds down when not in use (will not increase fan dimensions).
- ★ Low power demand does not affect fan's CFM.
- ★ Corrosion-resistant synthetic rubber housing.
- ★ On/off button glows when the light is either on or off, and is visible when the fan is running.
- ★ Available on new gasoline VENTRY FAN Models 20GX160 and 24GX160.
- ★ Can retrofit only to existing VENTRY FANS that already have an Entry Point Safety Light due to the required engine coil.

Best selling 20GX160 VENTRY FAN with the optional Entry Point LED. (Optional Medium Flat-Free Wheels & Skids also shown.)
