

## NEW PRODUCT RELEASE

# Entry Point LED adds Safety, Safety, Safety!

A second Articulated Top Safety Light—the Entry Point LED—is now available as an option on **VENTRY® PPV Fans**. The Entry Point LED is bright, self-contained, and powered by a coil in specially-equipped Honda GX-series motors.

This light is a **tremendous safety feature** for fire fighters as a point of entry light, lighting the scene before entry, lighting the exit on the way out, and lighting the fan itself during rapid departures!

### Entry Point LED Benefits

- ★ Solid state so no bulbs to burn out
- ★ 50,000 hour life expectancy (5.7 years)
- ★ Low power demand does not affect fans' CFM
- ★ 16 watts, 250 lumens
- ★ 6 diode pattern
- ★ Corrosion-resistant synthetic rubber housing
- ★ Unlimited aiming and folds down when not in use
- ★ Glowing red LED button-operated

The LED requires so little power for operation that none is diverted from moving air. The LED is push-button operated. The button glows red whenever the fan is running so it's visible in the dark whether the Entry Point LED is on or off.

The LED is articulated and may be aimed in any direction. It folds down when not in use and adds nothing to a fan's storage dimensions.

The Top LED Light is optional on new gasoline **VENTRY Fan** models 20GX160, 24GX160, and 24GX200. It only retrofits to existing **VENTRY Fan** that already has a halogen Entry Point Safety Light.

Best selling 20GX160 VENTRY Fan with the optional Entry Point LED. (Optional Medium Flat-Free Wheels & Skids also shown.)
